

NEVERLAND

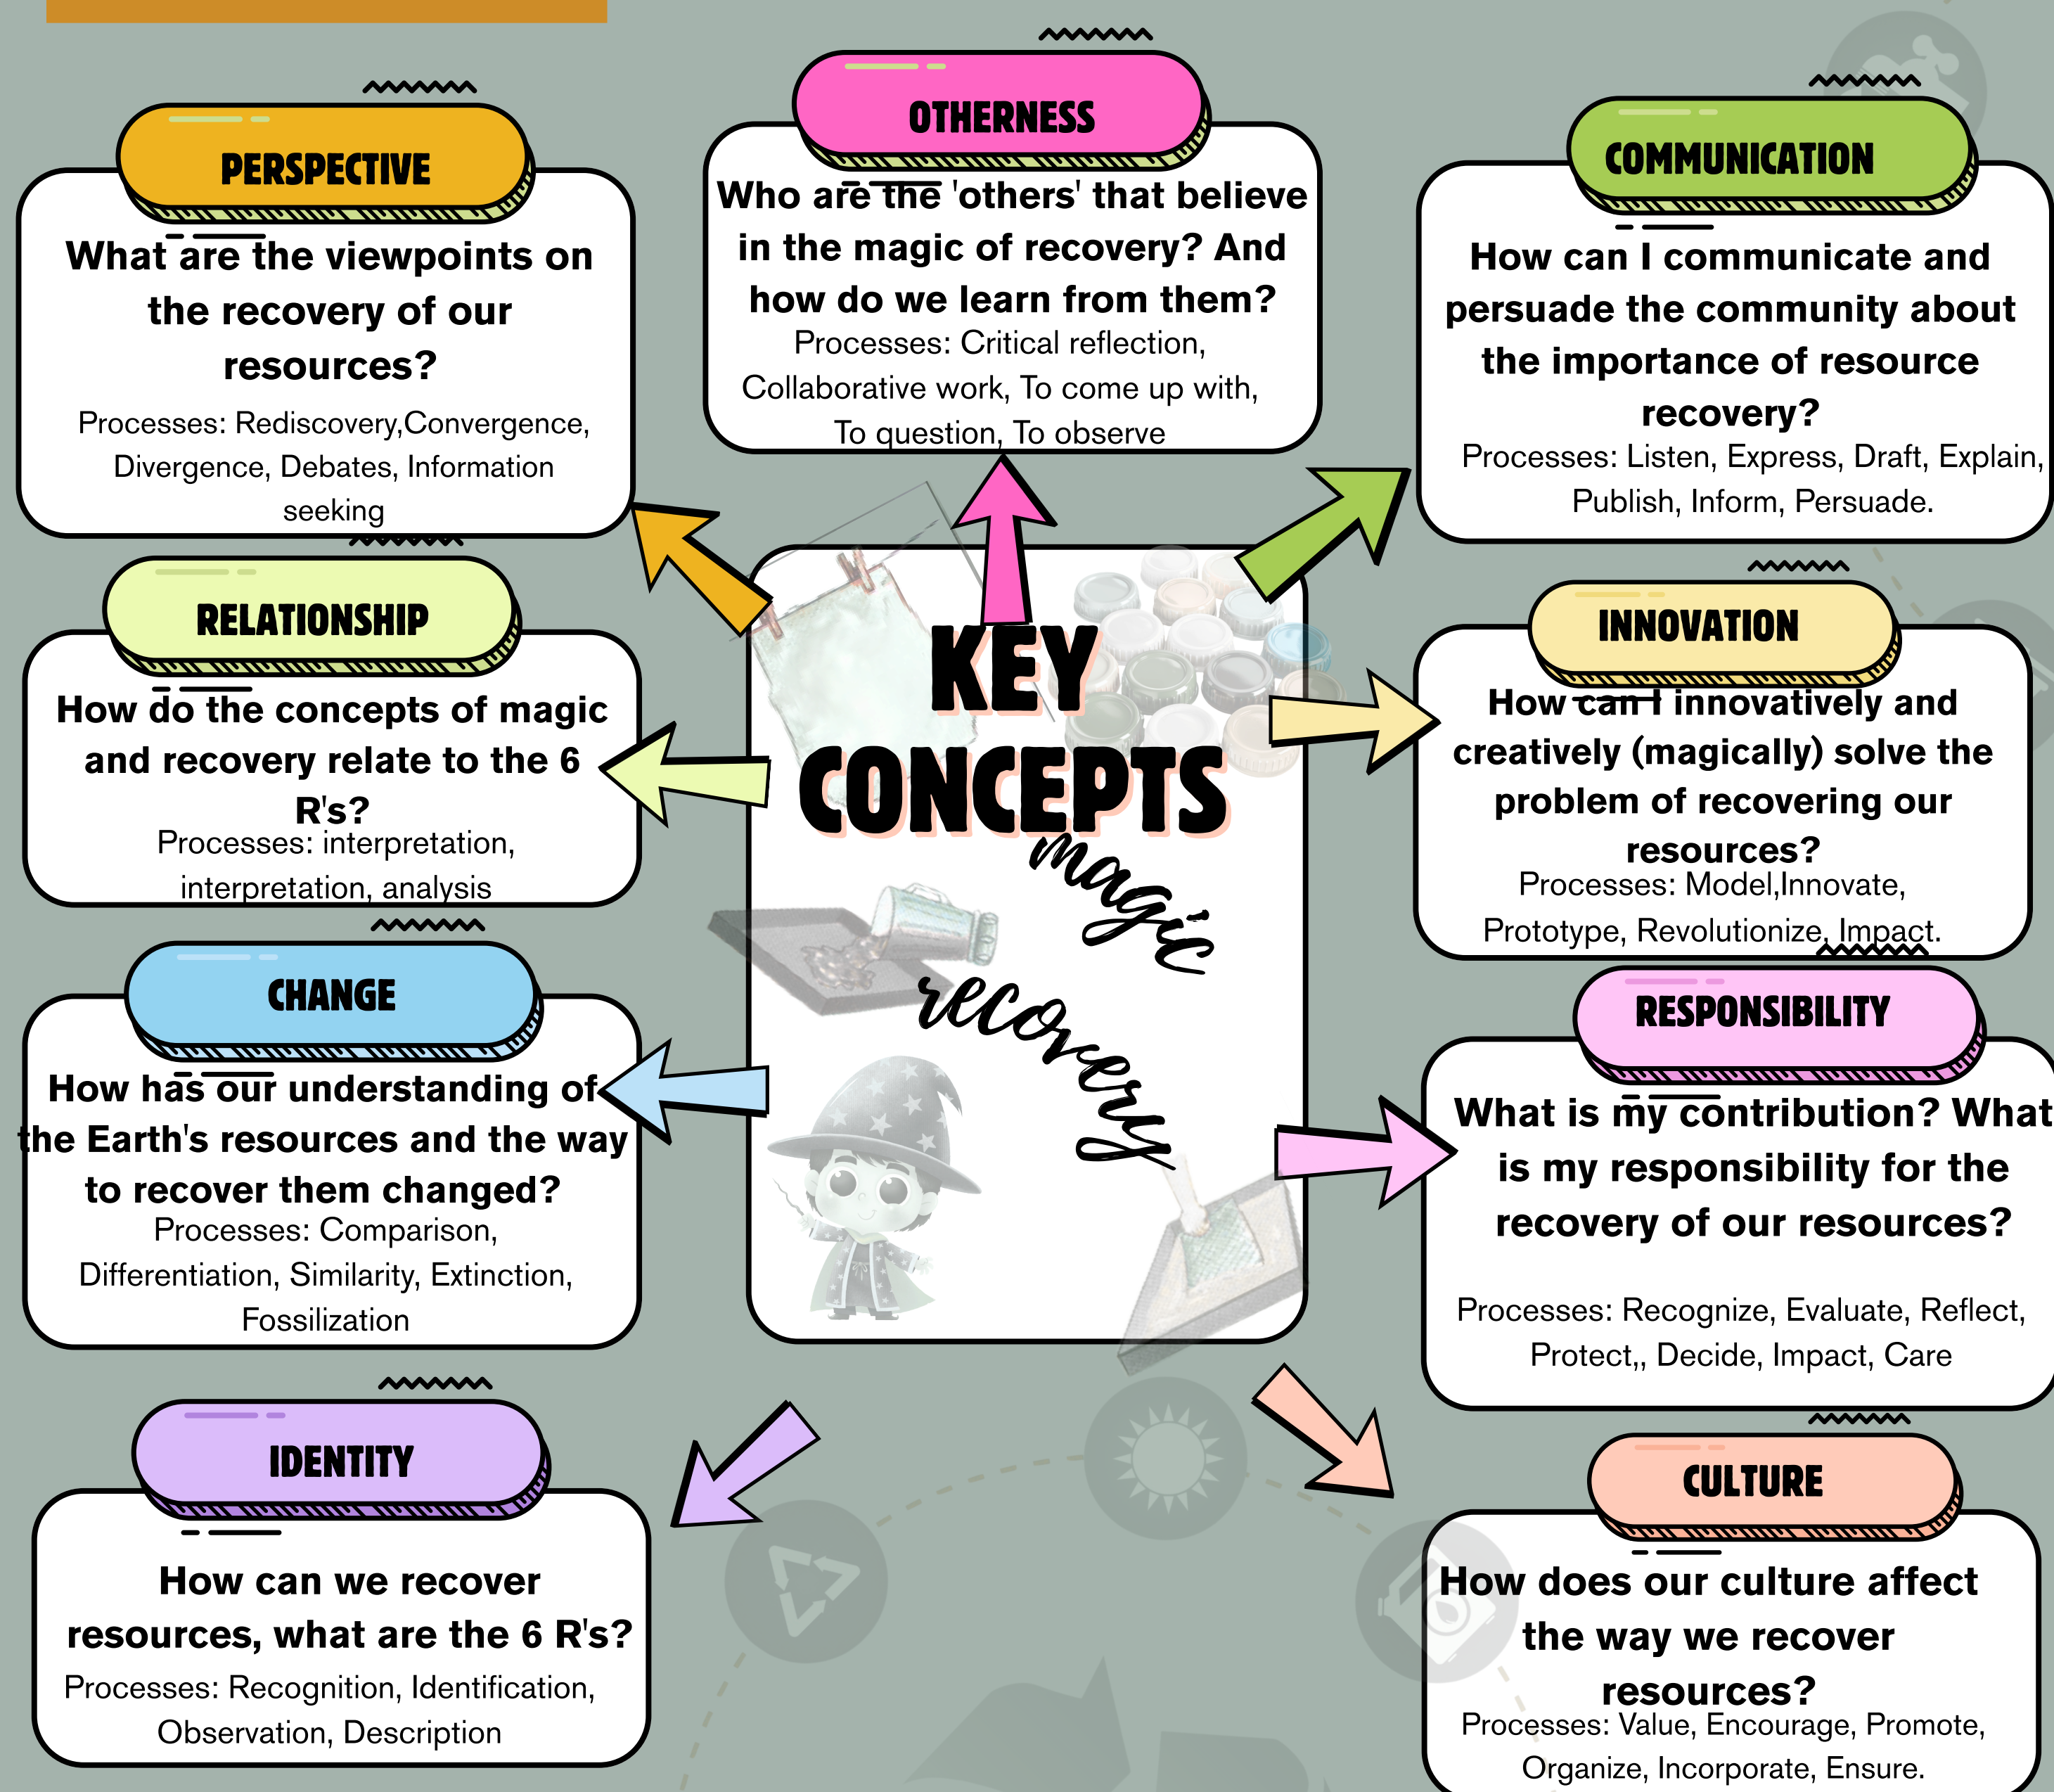

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

Globally, we currently consume resources as if we had 1.75 planets at our disposal. By 2050, the population is expected to reach 9.7 billion people, which would require nearly 3 planets to maintain current lifestyles

What World Do You Want in 2030?

WHAT
We offer a variety of products that blend the beauty of reused materials with magical elements that captivate those seeking something special and sustainable. Our transformative art conveys messages of hope and renewal through each unique piece.

HOW
We use 6R's techniques inspired by SDG 12 on responsible production and consumption to transform discarded materials into useful items, home decorations, fashion accessories, notebooks, planners, and art pieces filled with charm and fantasy.

WHY
At EARTH GUARDIANS, we create magical products to convey a message of environmental awareness and creativity. We draw inspiration from sustainability and magic to bring your unique creations to life, transforming energy and reclaiming resources.

Meeting with the Mentor

Tests and Enemies

Return with the Elixir

In the magical corners of Neverland, a group of young wizards joins Project Neverland, driven by the desire to transform underused resources and protect the Earth by applying the 6 Rs for responsible consumption and production.

At the prestigious School of Magic, the masters and **Regent Queen Rhiannon** train and guide the youngsters—assigning them roles (elves, hybrid creatures, and hatters)—to refine their gifts and prepare them for real sustainability missions.

Through demanding training and community missions, they face the resistance of consumption habits, scarcity, and environmental problems (deforestation, single-use plastics, hyperconsumption) that challenge their ingenuity and solidarity.

After the Great Expedition they return to Neverland transformed, carrying teachings, replicable practices, and recovered resources; they found Earth Guardians and share the magic of the 6 Rs to empower communities and care for the planet.
