

HEROES

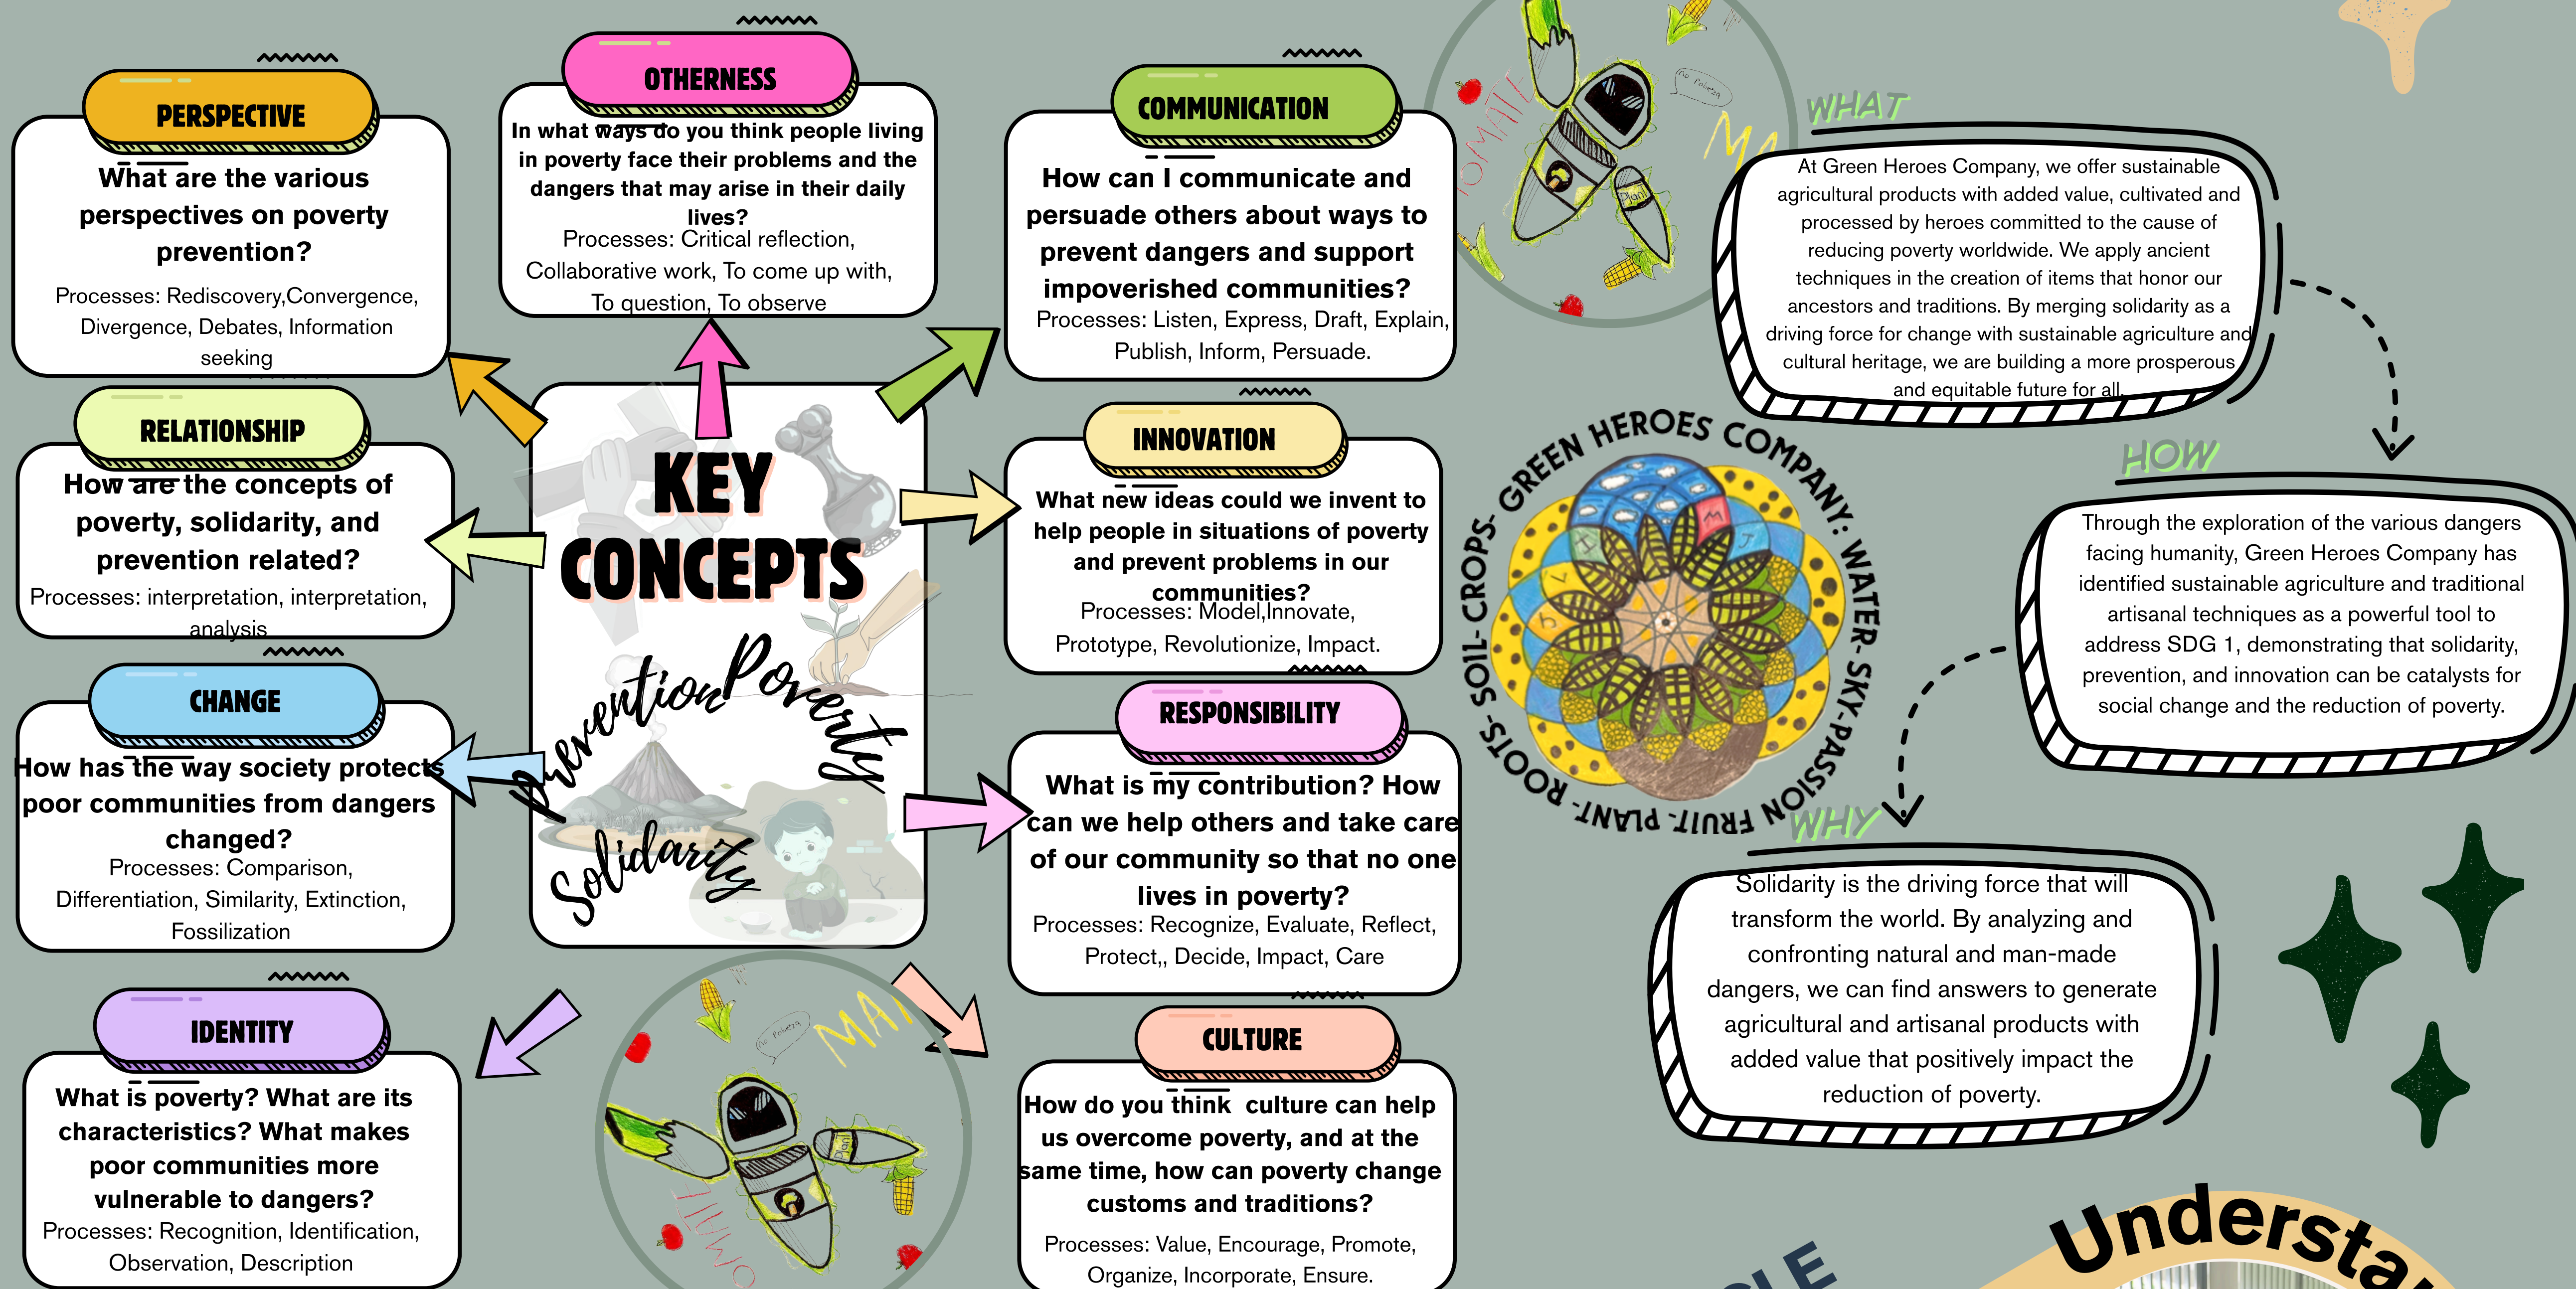

1 NO POVERTY

More than 700 million people, or 10 percent of the global population, still live in extreme poverty today, surviving on less than USD\$1.25, which is \$4,877 Colombian pesos a day.

What World Do You Want in 2030?

Call to Adventure

In a world where fourth-grade children inhabited Earth, a beautiful planet threatened by natural dangers and a lack of environmental awareness, a group of children felt an inner call. They decided to form the league of the Green Heroes to awaken everyone's potential and protect the planet, inviting others to join their noble cause. Despite their doubts about being small and inexperienced, they embraced the mission and bravely accepted the adventure.

Meeting with the Mentor

Soon they found the wise **ECOGUARDIAN**, who became their guide and mentor. **ECOGUARDIAN** taught them about solidarity and prevention, showing them that every small gesture matters and that true strength lies in unity and mutual support.

Tests and Enemies

With a new purpose, they founded "Green Heroes CO" to promote sustainable agriculture and social justice. Despite facing challenges such as the indifference of some adults and greed, they overcame obstacles through innovation, cultivating traditional products and honoring their cultural heritage. Additionally, they taught others about the importance of caring for the environment, using their solidarity and prevention as key elements to sustain their mission in the face of adversity.

Return with the Elixir

As a reward for their commitment and bravery, the Green Heroes spread their legacy of solidarity and prevention, inspiring others to protect the Earth. They returned transformed, carrying an "elixir" made of shared experiences and knowledge, ready to continue their fight for a sustainable future.
