

KINTSUGI

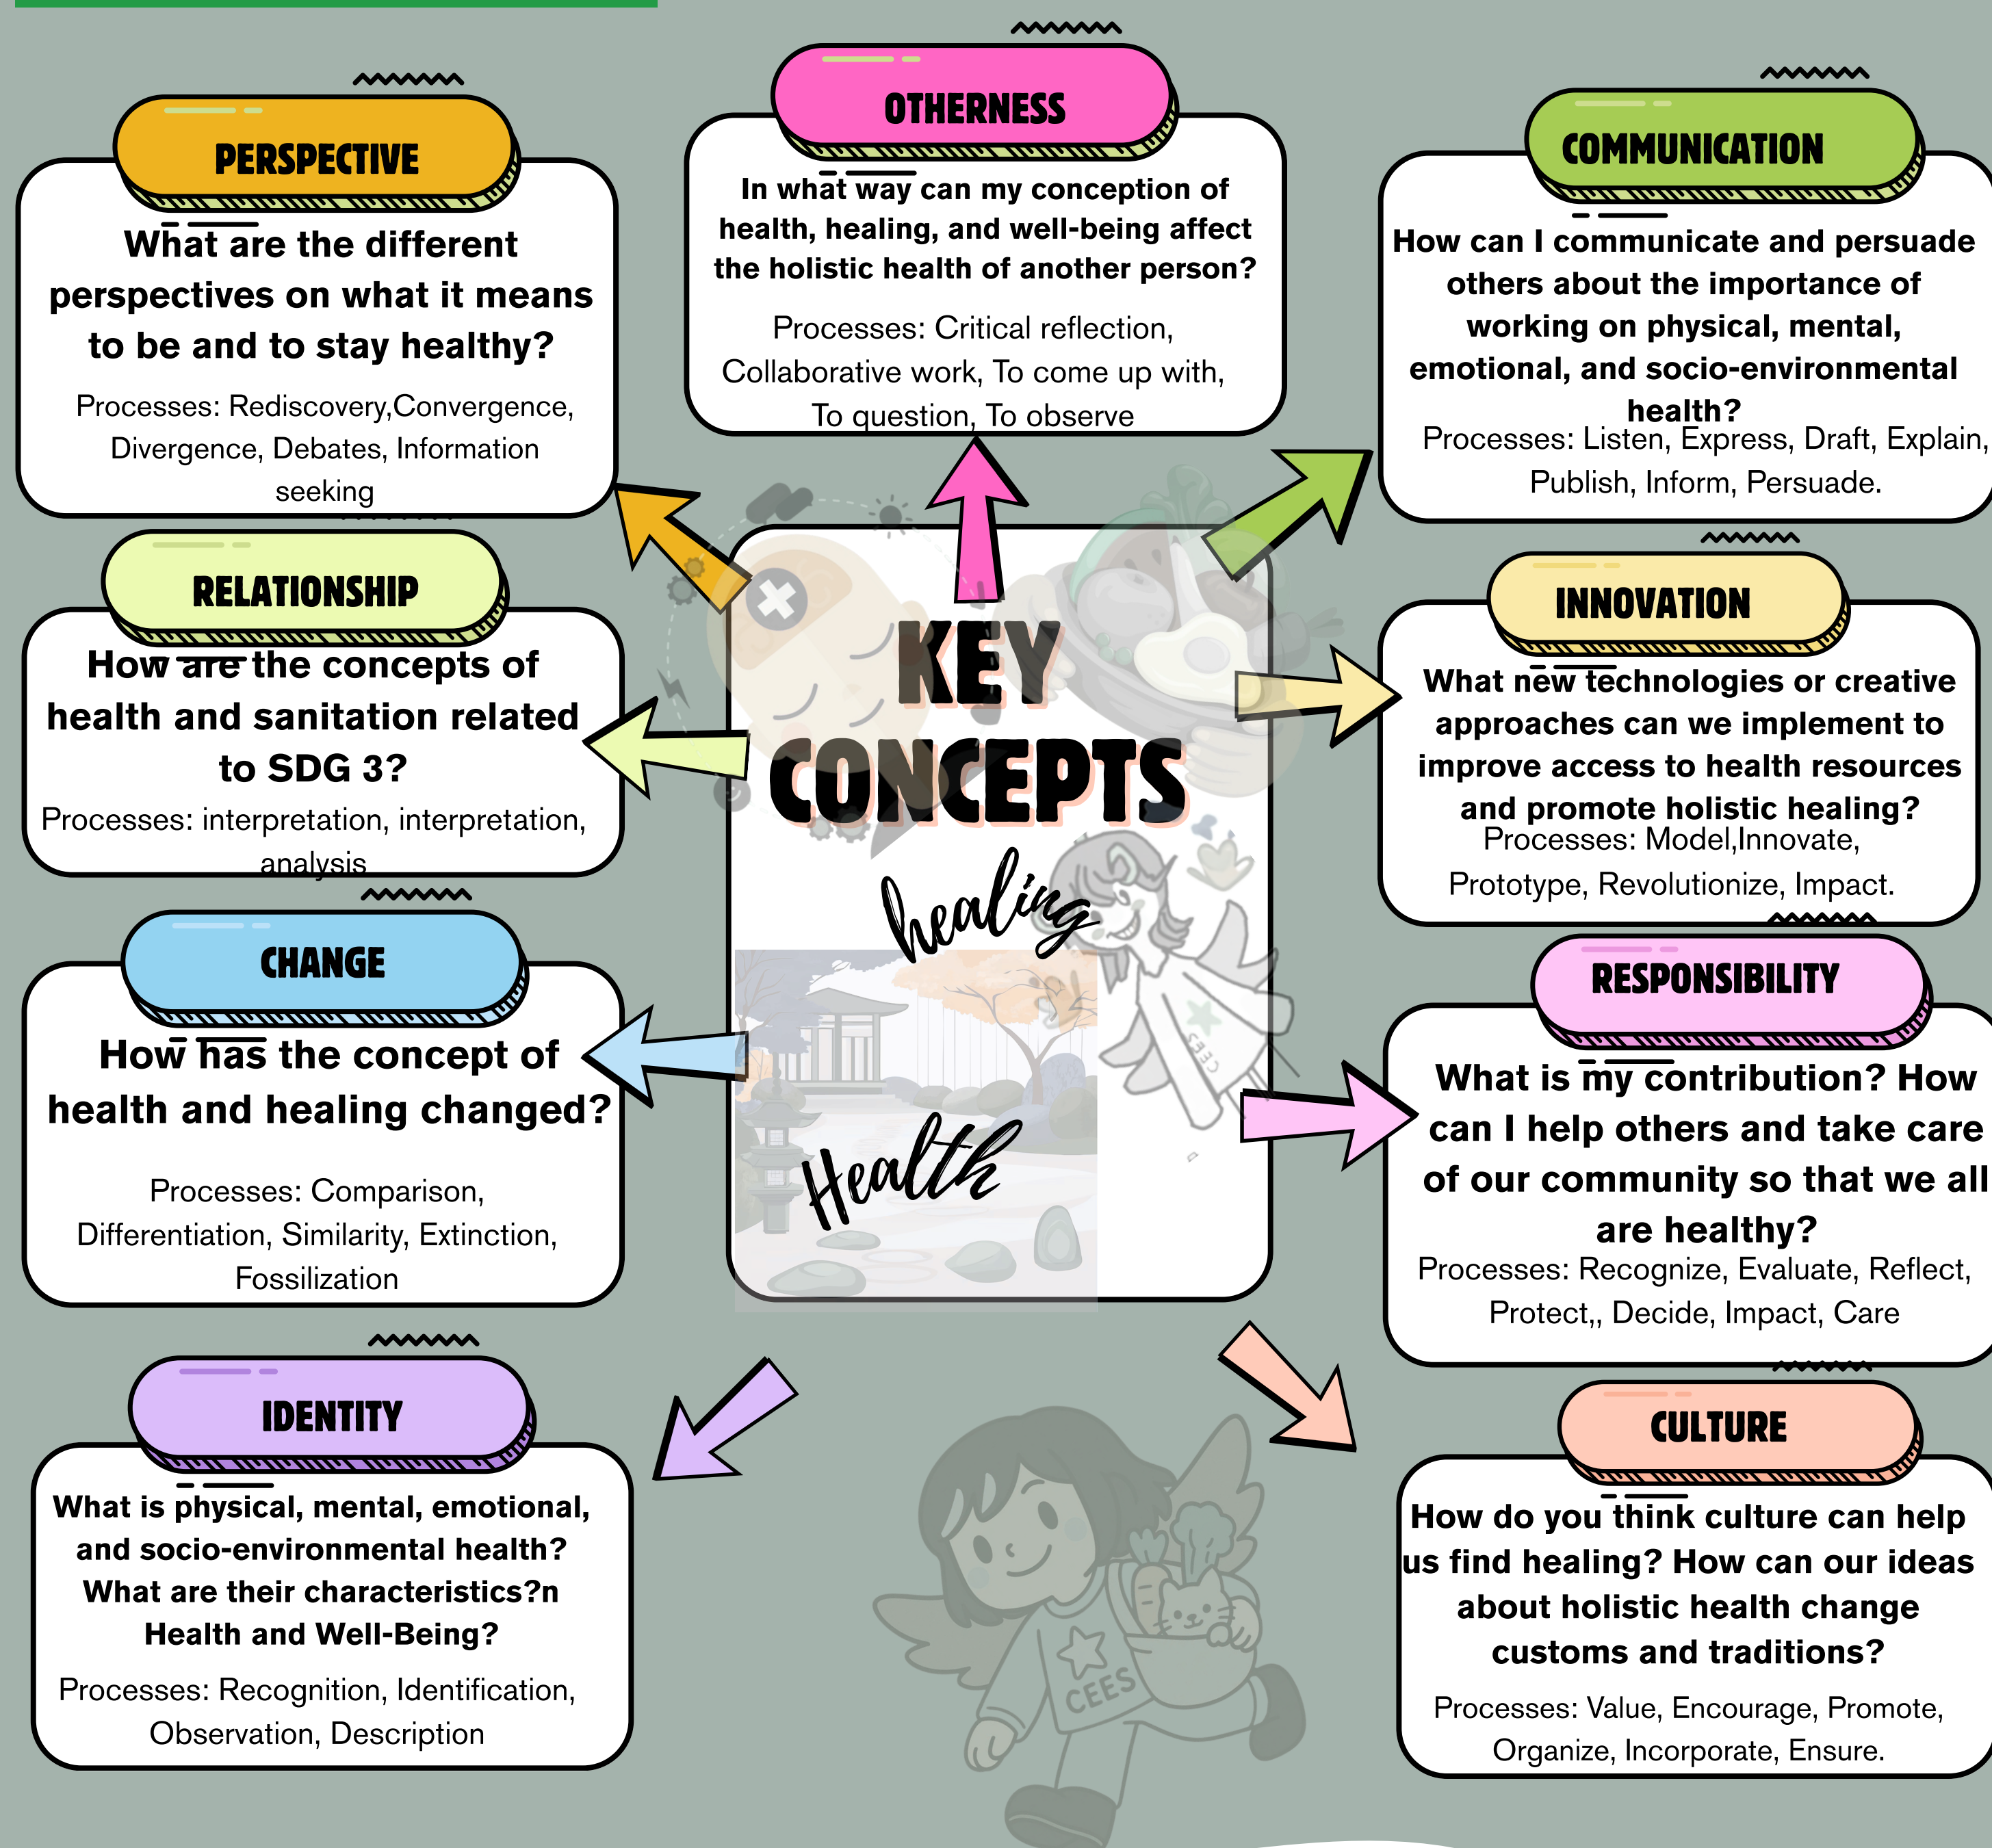

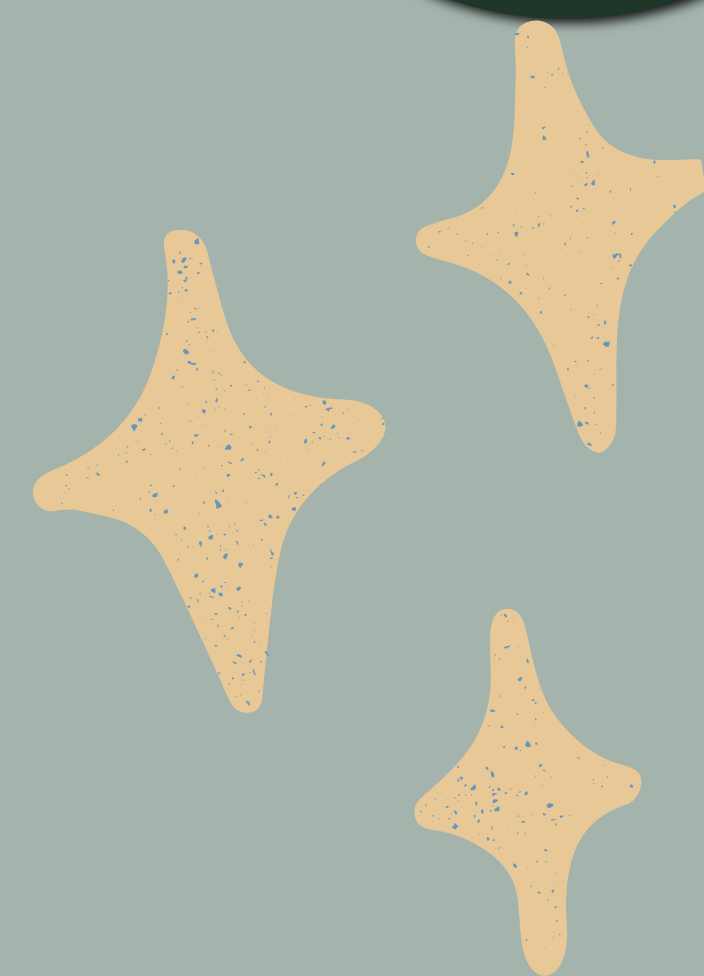

3 GOOD HEALTH AND WELL-BEING

According to the World Health Organization (WHO), non-communicable diseases (NCDs), which are related to unhealthy habits, account for approximately 41 million deaths annually, representing 71% of total deaths worldwide. Of these, 15 million are premature deaths occurring in people aged 30 to 69 years.

What World Do You Want in 2030?

A Healthy Future in the City.

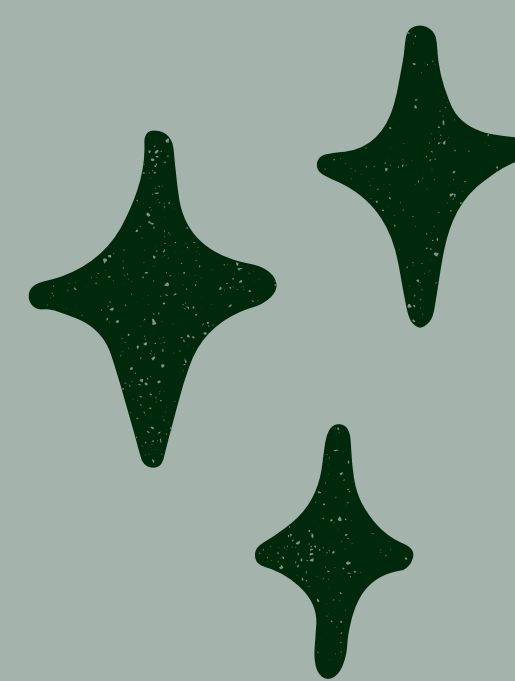

Urban Vitality offers a range of products designed to heal and rebuild both human and environmental health. Based on the principle of Kintsugi, each item created by the citizens of Kintsugi conveys the essence of beauty in imperfection, reminding us that healing can turn our scars into strengths and our surroundings into a vital and harmonious space.

HOW

At Urban Vitality, we provide solutions that promote physical, mental, emotional, and socio-environmental health based on the philosophy of Kintsugi, the Japanese aesthetic reconstruction that finds beauty in scars. Our products are more than just remedies; they are tools meant to heal and harmonize, restoring balance to body, mind, soul, and environment. By aligning ourselves with SDG 3 (Sustainable Development Goal 3) on Health and Well-being, we offer a holistic approach that nurtures and transforms from the inside out.

WHY

We embrace SDG 3 (Sustainable Development Goal 3) on Health and Well-being as the cornerstone of our purpose. We believe in the importance of healing and rebuilding not only our physical bodies but also our mind, spirit, and the socio-environmental surroundings that encompass us.

Call to Adventure

In a quiet town, **Lumen Brillante**, a boy with the ability to see the emotional pain of others, discovers a group of peers facing challenges in their lives. Inspired by their suffering, Lumen suggests they join a global organization of healers to promote health in all its forms.

Meeting with the Mentor

Lumen acts as a mentor, guiding his friends with love and understanding. He reminds them that true healing begins from within, with healthy eating, positive thoughts, healed emotions, and a sustainable environment, and that they can transform their scars into strengths by joining his cause.

Tests and Enemies

The children, joining Lumen in the venture of Urban Vitality, face significant challenges regarding physical well-being, mental health, emotional health, and environmental quality, including air quality in their city. Using a STEAM approach, they create innovative solutions such as recipe books, gyms, zen gardens, sensory pathways, and a shelter to regenerate the soil. Throughout their mission, they find unexpected allies who support them on their healing journey.

Return with the Elixir

After overcoming their challenges and revitalizing the health of their city, the children undergo an internal transformation, reborn as heroes. They learn that scars are testimonies of resilience and beauty. They return to their community with inspiring messages and innovative products, bringing healing and light to every corner of the city and beyond.

DESIGN CYCLE

Materialize

Understand

Explore

Their legacy endures in the zen gardens and shelter they created, reminding everyone that, just like in kintsugi, wounds can be repaired and transformed into something beautiful. Thus, their story becomes a testament to resilience, love, and the powerful ability to change the world, one step at a time.
