

DYSTOPIA

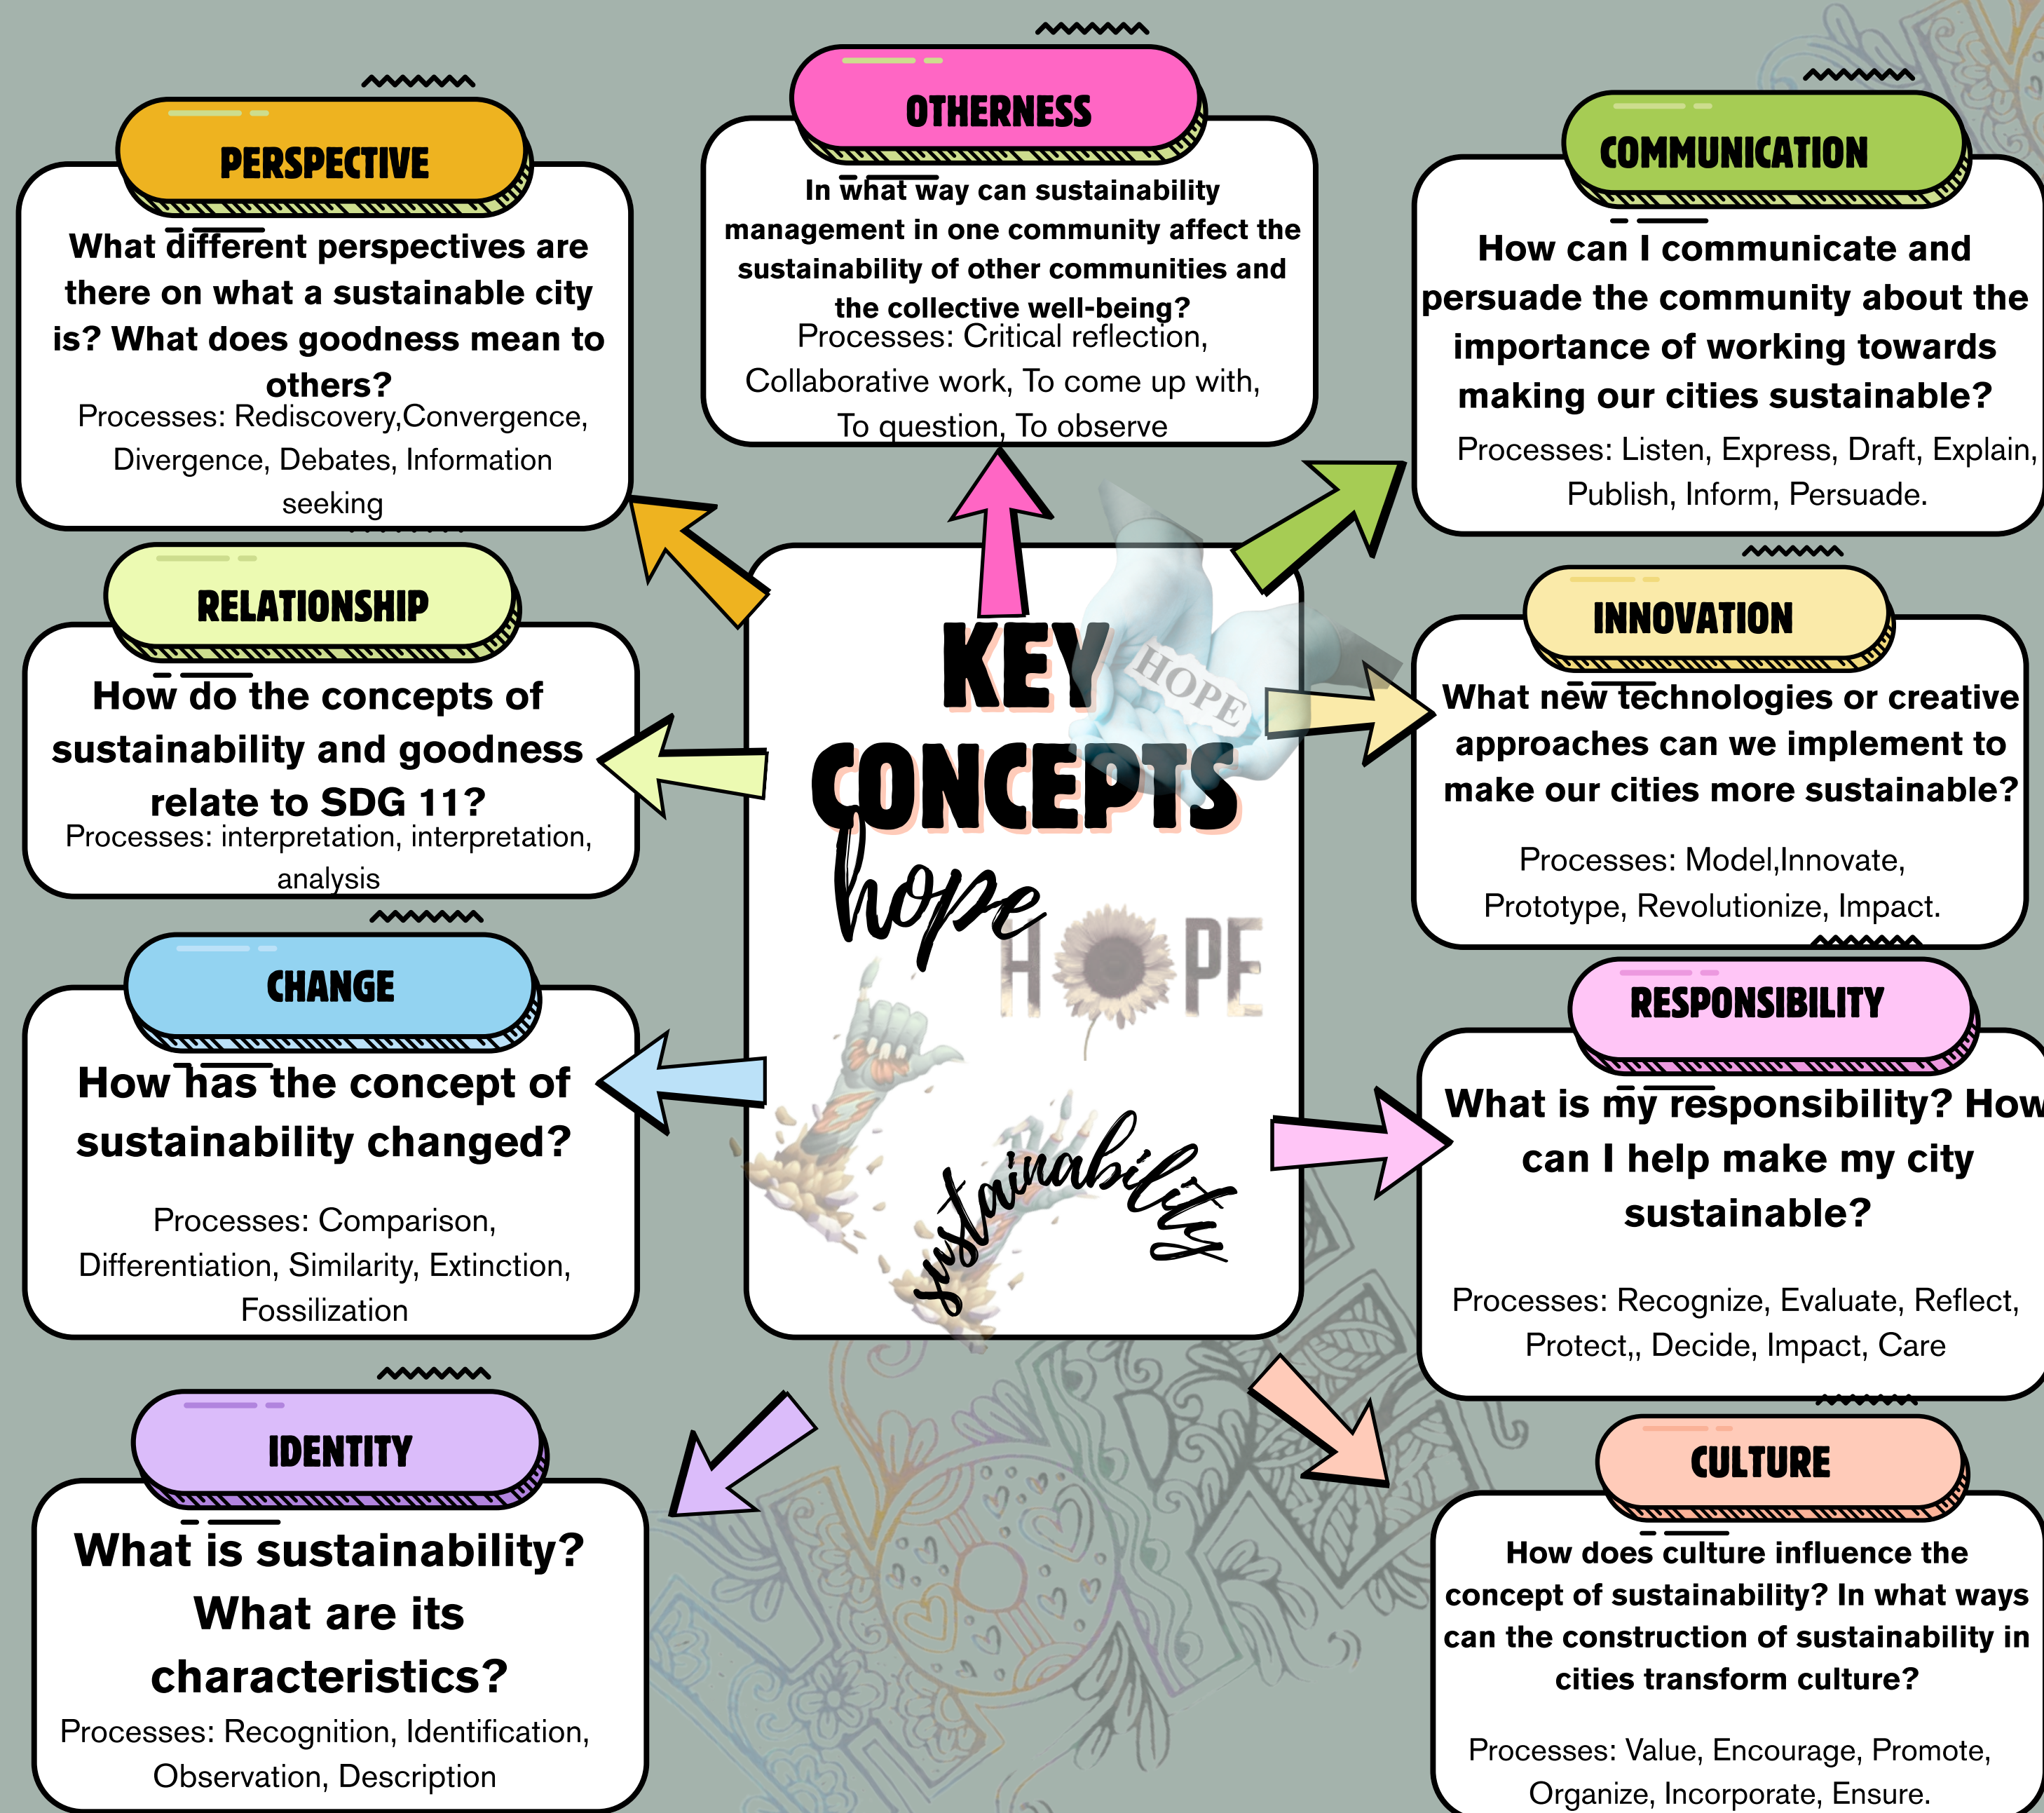

11 SUSTAINABLE CITIES AND COMMUNITIES

Currently, more than half of the world's population lives in cities, and this number is expected to rise to 5 billion by 2030. Cities, which occupy 3% of the land, are responsible for between 60% and 80% of energy consumption and 75% of carbon emissions

What World Do You Want in 2030?

WHAT
We sell hope and a firm conviction in the human potential to recover and be reborn. Through initiatives focused on environmental sustainability and community empowerment, we aim to inspire others to believe in the positive transformative capacity that resides in every person and every community. Ecovita, the innovation hub, is a symbol of resilience and renewal for all those seeking a new beginning and offers as a product immersive experiences that highlight the human ability to reinvent and survive

HOW
We will create a city that inspires and nurtures the human spirit, providing through the Ecovita innovation hub an environment that promotes hope, resilience, and renewal. Through innovative educational programs, exemplary sustainability practices, and community gathering spaces, we work to cultivate a sense of belonging and optimism in every resident of our city. We are committed to providing the tools and support necessary for each individual to flourish, create, innovate, and contribute to the rebirth of our society.

WHY
We are a beacon of hope in a world affected by adversity, demonstrating that through kindness and sustainability, it is possible to rebuild more resilient and harmonious societies. We firmly believe in the human capacity to recover and be reborn, even in the darkest moments. Inspired by the need to avoid repeating the mistakes of the past, we are committed to building a sustainable city where hope and renewal are the guiding principles.

Call to Adventure

In a dystopian city engulfed in chaos and despair, a zombie pandemic erupts, forcing the population, trapped in their routines, to confront a new enemy. The situation changes when researchers reveal that the virus originated from a failed genetic experiment, a serious mistake of the past that threatens their future.

Meeting with the Mentor

Amidst the turmoil, a charismatic leader emerged: a passionate scientist who had dedicated their life to research. With determination, they gathered the survivors and showed them the way to salvation. "We cannot stay here," they said with a firm voice. "We must find a refuge, a place where we can start anew and never repeat the mistakes that brought us here." Under their guidance, the citizens began to organize, forming a plan to escape from the besieged city.

Tests and Enemies

The journey was not easy. While many joined the effort, others opposed it, clinging to the comfort of the familiar. Along the way to their new home, they faced zombies and dangers that threatened their lives, as well as the betrayal of those seeking to take advantage of the situation. However, united by hope and the desire to build something better, the citizens overcame each obstacle. They learned to work as a team and to trust in their abilities, while the figure of the leader rose as a beacon of light amidst the darkness.

Return with the Elixir

After a challenging journey, they discovered a secluded spot in the mountains and founded Ecovita Hub, a center for innovation and research that represented their renewal. This refuge aimed to learn from Colombia's history and the roots of its conflicts to prevent repeating past mistakes. Citizens also established secretariats focused on sustainability in various sectors, creating an ethical and ecological system. They innovated and proposed solutions to significant global challenges, promoting critical thinking for growth and peace.

In this new home, they found a haven of peace, where they could live together in harmony. Ecovita became a symbol of hope and resilience, a place where humanity could flourish and create a bright future, learning from the past but not being bound to it. Thus, the hero of this story was not just an individual, but an entire community, united in its struggle for a better future.
